

National Student Electronic Media Convention
Minneapolis, MN #CBIMinneapolis
October 22-24, 2015

Welcome to Minneapolis!

On behalf of the College Broadcasters, Inc. (CBI) Board of Directors, I'd like to welcome you to Minneapolis for the National Student Electronic Media Convention (NSEMC), or CBI Minneapolis for short. The NSEMC is dedicated exclusively to the interests of student radio stations, TV/video outlets, and webcasters. Whichever category—or categories—you fall into, we are confident that you will leave the convention with the skills and motivation to improve your student media outlet.

Now in its fourth year, the NSEMC is well-established as the top conference for student electronic media to learn, network, and be recognized for their great work. But CBI is determined to make this year's convention even better than the previous three. Among the enhancements this year include a great venue located in the heart of vibrant downtown Minneapolis and a pre-convention workshop dedicated to new and newer advisers. Adobe Creative Foundations, a free half-day session on Adobe Creative Suite, is also being hosted by an Adobe Education Leader. That's in addition to what's made us so successful since our inception—high-quality sessions led by advisers and media pros, student-led roundtables, and networking and social opportunities.

I am pleased to announce that this year's keynote address, "Clear, Concise, and Compelling: Use Content Strategy to Better Tell Your Story," will be given by Clinton Forry, Vice President of Content Strategy at Weber Shandwick. Clinton has worked in new media, old media, and media marketing. Most importantly, Clinton is an expert on telling stories and, regardless of what media we work in, we are all storytellers, so I am confident we will all benefit from his expertise on focusing your message and making sure your content is doing what you want it to do.

But the convention experience is more than just what you get in the sessions. The NSEMC's downtown Minneapolis location puts you

in close proximity to a wide variety of restaurants, live entertainment venues, and other attractions. I encourage you to take full advantage of them. Plus, CBI has arranged tours of a few local media facilities exclusively for CBI Minneapolis attendees.

Finally, as with everything CBI does, the NSEMC would not be possible without our members. Thank you for being here, and for supporting CBI in all of its activities. Please let us know what you liked and how we can improve. Our membership meeting will be held on Thursday at 5:15 p.m. and a post-convention survey will be available at <http://askcbi.org/minneapolis/survey/>. We need your feedback to help us grow and serve you better.

Thank you,
Greg Weston
President, College Broadcasters, Inc.

Keynote Speaker, Clinton Forry

Saturday, Northstar A, 2:00 p.m.

CBI Minneapolis' Keynote Speaker, Clinton Forry, is Vice President of Content Strategy at Weber Shandwick. He has planned, produced, and edited content. Broadcast, published, and analyzed content. Written, tracked, and strategized around content. Since 1996. (Unless you count mix tapes, in which case, he goes back even further.) When he's not thinking about content, he's probably thinking about vinyl records. And he fancies wearing ties with his paisley and floral print shirts.

Forry's Keynote Address is titled "Clear, Concise, and Compelling: Use Content Strategy to Better Tell Your Story."

Pre-Convention Workshop

New and Emerging Adviser Training, Wednesday, Greenway C, 1:00-4:00 p.m.

During this intensive three-hour interactive workshop, the role of the adviser and its challenges will be discussed, along with how to manage, recruit, train, and motivate millennials, and touch on what you need to know about technology, FCC law, campus relationships, and business. Designed for advisers with zero to five years of experience working with student media along with Student Activities Directors and/or Vice Presidents working in Student Affairs with reporting from student media, this workshop addresses the needs of student electronic media advisers at large and small, public and private schools. *Missed this year's workshop? Look for 2016 offerings in Philadelphia.*

Station Branding for the New Consumer

Gone are the days of the overnight format change and clip art station logos. To make deeper connections with listeners, radio stations need to have strong brands that are built for how the new consumer wants to interact with their music. Karl Wolf and Eric Luoma from branding agency Fellow will walk through a recent station rebranding and discuss the qualities of a strong radio brand.

Get Your Station Inspected by Your State Professional Association

Get your radio station inspected and receive a “Get Out of Jail Free” card from the FCC. This panel features three experts who have had their radio stations inspected by their state's professional broadcasters association. These inspections allow your station to be certified to receive a three-year waiver from unannounced FCC visits. Two station advisers and one station manager will describe their experiences, including payment terms, the on-site visit, the public inspection file, and the Chief Operator appointment. Each presenter is from a different state and will bring unique perspectives and stories of their state inspections.

Tales from a College Radio Obsessive

Since 2008, Jennifer Waits has made it her mission to tour as many radio stations as she can, all over the country. With more than 90 of these field trips documented so far, she has a unique perspective on the diversity of college radio and the state of the radio world in 2015. Attendees will get to see some of the artifacts and weird objects spotted on these tours (does your station have a Leo Blais sign?), and will also learn about what makes different stations distinct.

When (or if) to Cut the Cord: Moving College Television Online

Recognizing changes in the consumption of media, Berry College transformed its on-campus TV station into a cutting-edge, web-based multimedia digital publishing house. Meanwhile, Piedmont College maintains a more traditional campus TV station in addition to an online student media hub. Both colleges look to the future as consumers rely more on mobile devices for their media consumption. The session will discuss this transition process, including the pros and cons of ending a traditional broadcast/cable station, curricular and administrative impact, and the on-going process of staying up-to-date with consumer viewing habits.

Music Departments, Promoters, and Dealing with the Mail

Radio promoters and music departments work together to fuel radio stations with records they need to create their own unique programming. Many stations prioritize music departments, reviewing every album received to make sure that the station has the newest and most cutting-edge music. Every station has its own philosophy for what kind of music it plays, and that plays a role in who will listen to that station

and its resulting audience. Determining your station's programming, forming relationships with promoters to help build your resources, and an organized, hard-working music department are essential foundations for building an audience.
